6.6%

Annual Growth (2012-2017)

STEPS

ETERNAL TRUSTS IS A DECENTRALIZED AUTONOMOUS ORGANIZATION (DAO) THAT CONNECTS SEVERAL POOLS OF EXPERTS WORKING TOGETHER TO FULFILL YOUR LONG-TERM OBJECTIVE

A SETTLOR FORMULATES A LONG-TERM PURPOSE

One becomes a Settlor within the Eternal Trusts ecosystem by purchasing ET Tokens. This initiates the process of decomposing the objective into multiple smaller tasks and storing it on the blockchain until a solution arises.

ORACLES VOTE FOR THE BEST SOLUTION

A randomized pool of Oracles, consisting of experts, organizations, and AI-algorithms, regularly votes using smart contracts to select the most optimal portfolio of solutions for the purpose.

PROVIDERS COMPETE TO FULFILL THE PURPOSE

Providers, consisting of companies in fields related to the Purpose, compete to fulfill it in the most optimal way.

THE PURPOSE IS FULFILLED OPTIMALLY

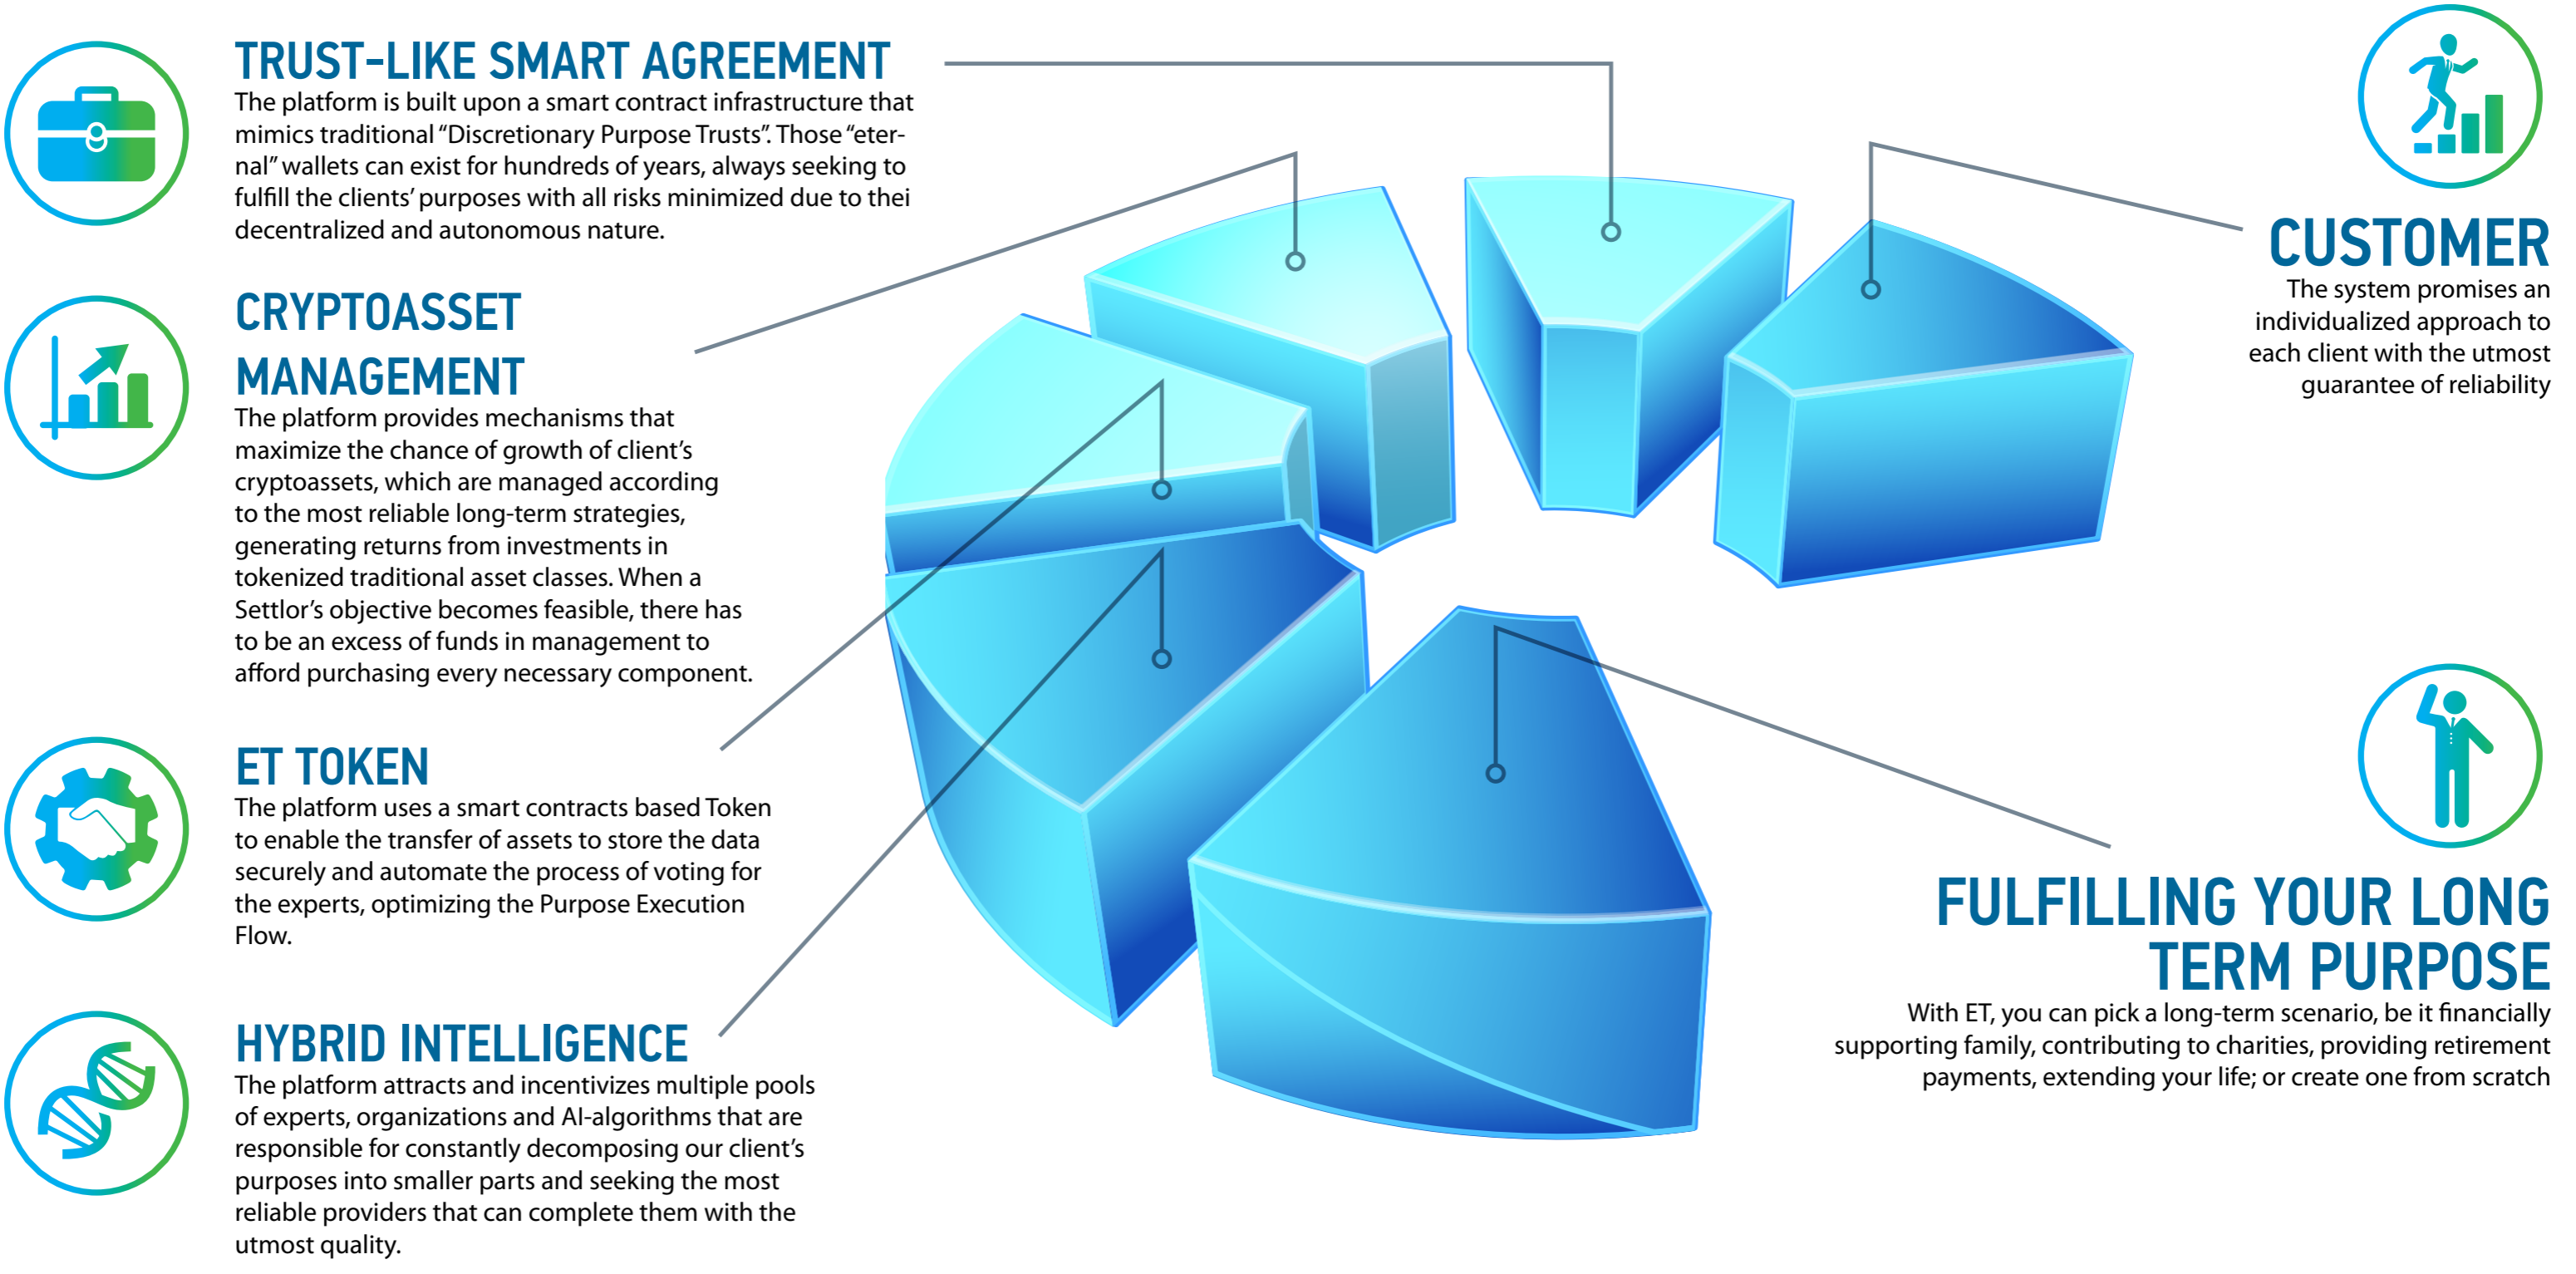

Oracles choose the most reliable Providers and ensure that the purpose is fulfilled with the highest degree of quality.

TRADITIONAL ESTATE PLANNING vs ETERNAL TRUSTS

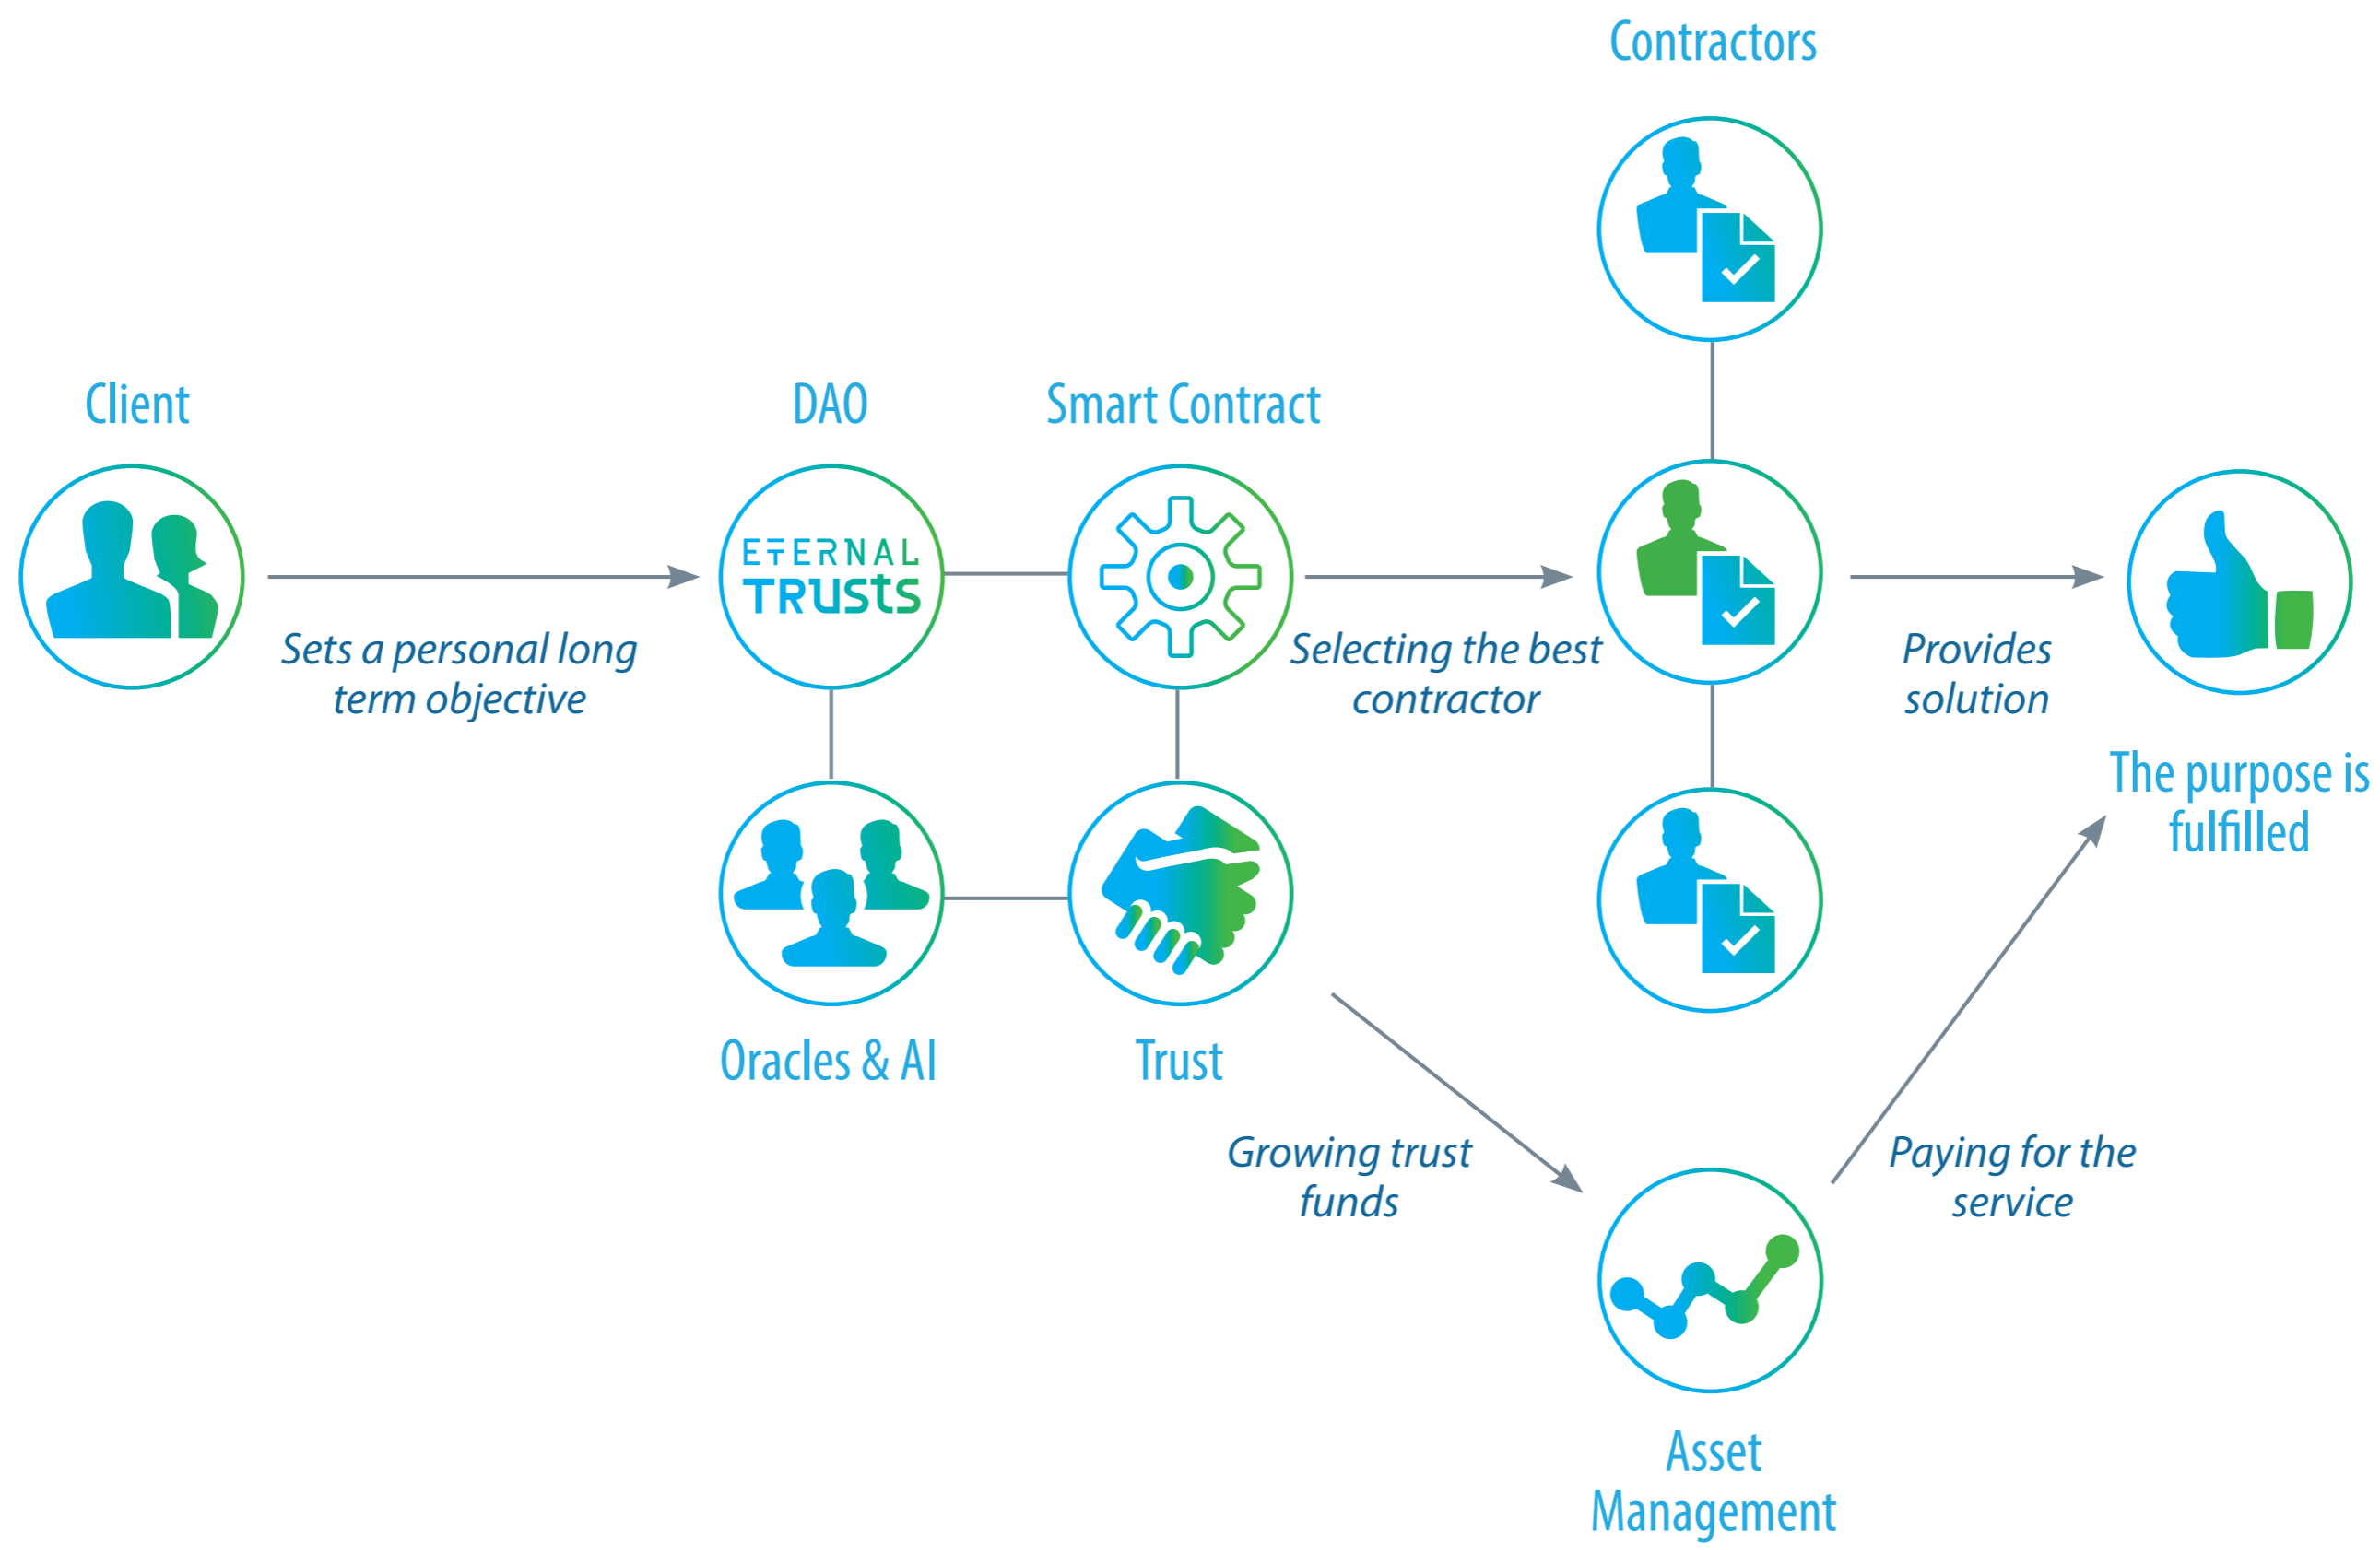

ETERNAL TRUSTS DISRUPTS FINANCIAL INDUSTRIES THAT STAYED UNCHANGED FOR HUNDREDS OF YEARS
